

## Coalite Regeneration Works

Period Monday 10<sup>th</sup> April to Sunday 16<sup>th</sup> April 2017

---

### Main Site Works Undertaken

- Area of sheeted ground to control odour remains at approx. 20,170 square metres.
- 25,000 litres of impacted water collected and removed from site.
- Site trial of a live time vapour measuring system.
- No other significant works.

### Monitoring

- A huge amount of monitoring, continuous and intermittent, is undertaken with many environmental properties being measured and reported every 5 seconds. This is done so that if the site works cause an unacceptable impact immediate action can be taken to address the cause.
- As is to be expected given the low scale of the works being undertaken no significant environmental impacts were detected either on site or off site.

### Complaints Received

- No complaints received this week.
