

COALITE COMMUNITY LIAISON GROUP MINUTES

MEETING: 28th June 2017 6:30pm to 8:00pm

Arkwright Centre, Hardwick Drive, Arkwright Town, Chesterfield, S44 5BS

Ref	Item
1	<p>Attendance</p> <p>Alison Westray-Chapman, Aiden Maltman, Lucy Withers, Cllr Mark Dixey, Mark Adams, David Gillies, Cllr Rose Bowler, Cllr Sue Statter, Cllr Brian Murray Carr, Alun Hayes, Melissa Rose, Cllr Pat Kerry, Chris Hepworth</p> <p>Apologies</p> <p>Nigel Lax, Rob Cooke, Bernard Haigh, John Gillies</p>
2	<p>Agree minutes from previous meeting</p> <p>Agreed</p>
3	<p>DSM update</p> <ul style="list-style-type: none"> - Rob Cooke was unable to attend but provided a written report which Alun read out. Written report attached with these minutes. - Aiden led a discussion on removal and masking of odorous material including burying/removal options. - Grant funding/programme was discussed - Director of Public Health England to sit on management group - Alison advised that Operations Group usually takes place prior to CLG but is out of synch this month with the next group on 7th July, therefore less to report today - Alison advised that developer had indicated market interest remained encouraging, and bodes well for projected jobs of 1500 - Mark said work expected relating to major hotspots, material would be

moved off site or moved to treatment area

- DSM had proposals to stockpile into bigger area which Mark has a few questions on....particularly in the absence of FROG data, which is expected soon
- Mark advised the need to talk through process...there may be lots of activity, then nothing for a while until reserved matters
- DSM/EA looking at permits/renewals
- Lucy advised that now that materials in treatment area we can review methodology and whether it is right approach to remediation
- Lucy advised that council will consider odours as part of reserve matters applications
- DSM looking at management of odour and minimising it with aspiration to eradicate it
- Cllr Dixey noted that where there has been a period where there has been little odour, people will get used to it being low and this could precipitate complaints
- Mark advised that methods evolve over time....will always try to improve things. EA want the reassurance of data from FROG – especially if site is mothballed
- A further discussion on odour was led by Chris
- Chris also discussed the other site on the opposite side of Buttermilk Lane on the other side. Started to undertake investigations but there was less concern re: odour for this site
- Aiden advised EA had asked for more investigations on this site to reduce uncertainty - this is the reason why Chris is undertaking work
- Never know what is in there until lift material but the more site investigation undertaken prior to work starting, the better. EA is reassured by focus on investigations
- EA advised that stockpiled soil will need turning – onus on DSM to think about how and when to do it to mitigate impact and ensure control. Expect DSM and the operators to think through why and when
- Process has involved learning e.g. smells more when it rains – important information

	<ul style="list-style-type: none"> - The idea of the open day was discussed and the importance the importance of before that is arranged it is crucial to have answers to questions about what is going where re: future development - Cllr Pat Kerry suggested deferring this until plans were more developed. CLG Agreed. - A Masterplan board was discussed for the site, which we understand Nigel Lax is arranging once plans are developed further - Melissa Rose discussed public concern re health which she felt should have been dealt with from start. Allison advised that it was. - Mark advised that gathering of data continues and still have data coming in but everyone wants to get down to minute detail to rule out all eventualitiesmight be overkill but we want to be reassured so we can reassure public. - Mark advised that if there was anything EA considered a risk...DSM wouldn't be operating - As part of 4 or 5 further phases...this process allows us to iron thngs out. The thing with odour is just because you can smell it doesn't mean it's harmful. EA will get that reassurance and will keep asking for more info - Melissa asked whether measuring of VOCs was in live time - Lucy said the monitoring would measure semi volatile organic compounds too - A question was raised about which microorganisms where being used on soils? – Rob Cooke to provide answer - Sue Statter – said it was important to consider future communication in the context of safety versus odour
4	<p>Communications Update</p> <ul style="list-style-type: none"> - Update on Comms provided by Alun Hayes - It was agreed that the July meeting of the CLG would be cancelled - Rob's written report to be circulated with minutes. Alun Hayes to action - Lucy Wither asked that weekly reports should be updated on the website. Alun Hayes to action
